RivieraPool[®]
PREFABRICATED SWIMMING POOLS • WHIRLPOOLS

Living by the water ...

Beautiful by nature, water has the unique capacity to both invigorate and calm our senses – providing both comfort and recreation to our daily lives. Water is at the very centre of everything in this world – an integral and critical component of this garden we call life. By creating a carefully designed, thoughtfully curated outdoor living space for your home, you can build a luxurious private oasis centred on your own wellbeing and relaxation.

When we dream of precious moments spent by the water, we rarely wish for a basic, industrial swimming pond or swimming pool. Instead, we dream of gorgeously cascading natural water, the sound of sweetly gurgling water as it dances around our feet, and the delicate

way the light bounces off the natural flow of the water as it moves throughout the space. It is with this commitment to water's natural beauty that we created the iconic D•Line prefabricated pool series. Naturally staged water meets a modern, stylish design – creating a symbiotic blend of cutting-edge design with the splendor of Mother Nature. Seamlessly incorporating natural ambiance with function, the D•Line prefabricated pool series from RivieraPool is a modern marvel of design that is sure to delight and inspire. The crisp, clear, clean lines of this spectacular pool deliver endless amounts of style, while the countless customisation options ensure a stunning pool experience as unique as you are. The D•Line eliminates any visually disruptive

technical elements, leaving the chic and sleek pool the focal point of your own personal backyard oasis. The RivieraPool D•Line pool series offers industry-leading customisation options that maximise your personal expression, from a natural stone pool deck to a seamlessly designed surface that appears to be cast from a single piece, a picturesque Infinity Channel with sweeping panoramic views to a WetLounge designed for entertaining, and anything in between – the RivieraPool D•Line pool series allows you to create your own water-centred sanctuary right in your own backyard. Explore, imagine, and discover the possibilities of designing your own water garden through the following pages.

The RivieraPool D•Line series: So much more than a swimming pool.

ANCONA D-Line

Five steps: Chic and subtle

The Ancona is stylish simplicity at its very best. Possessing everything that a pool purist would want, the Ancona offers absolute calm and restraint in the lines, while also offering sleek functionality and beautiful design. From the five simple steps and the angular, stylish stainless steel handrail to the rectangular shape, the Ancona is how the D-Line focuses on form and function without losing sight of style and design. With the massage and flow system discretely integrated, users are treated to a soothing sensory experience that you can absolutely feel but can hardly see or hear. With water gently flowing along the curb of the pool, the Ancona also features the infinity channel – a unique, chic design that offers comfort with a stunning visual that is sure to be the highlight of your backyard garden.

ANCONA D-Line

*Beyond imagination. Beyond description. Beyond words.
The Ancona D-Line delivers exceptional class, sophistication, and
simplicity that defies all expectations.*

Design line from RivieraPool.

*The Ancona in an impressive size. A pool design built for those beautiful, fleeting moments
between waking up and sitting down for Sunday breakfast – the ideal way to start the day fit!*

MODENA D-Line

Design. Quality. Functionality.

Among our most time-tested, customer-approved, best-selling models of all time, Modena has delivered superior quality, functionality, and stellar design for many years. The Modena is a beautiful paradox – being both a classic and a newcomer all at the same time. How so? Never willing to settle, RivieraPool has remained dedicated to updating and improving upon this carefully thought out and meticulously crafted pool – which means that while the design has remained classic, the improvements have kept this series fresh, exciting, and ever-improving. The concept impresses with its straightforward design and diverse functions, and offers total flexibility that centres on the needs and wants of the owner. Whether looking for a simple, sleek pool or a tech-

nologically advanced spa-like experience, Modena can be delivered plain or with a technique shaft designed to hold all the bells and whistles. With customisations that can range from including a WetLounge to the iconic infinity channel, Modena offers brilliant functionality with a gorgeous design. Modena features a 6-step entry, wide seating and lounging areas, various flow and massage systems opposite the roller shutter, and offers the optional infinity channel. Consider including the optional WetLounge as the entrance to your pool – a shallow water zone ideal for children to play in or adults to relax in. Endless possibilities: Modena.

Classic design with a modern vision.

This Modena features our bright, fresh, vibrant papyrus colour. The absolute and undeniable highlight of this pool is the infinity channel at the far end of the design. While swimming, you will experience the brilliant expanse of the design and the smooth water surface that maximises your relaxation. The wonderful, calm, smooth Modena pool experience allows you to find oneness with the water.

MODENA D-Line

The Modena 370: Contemporary pool design for your home that your family will love. Experience the chill seating and lounging areas as you connect and relax with your family. Dimensions: 7.75 m x 3.7 m, colour: Granicite stone grey.

The Modena pool features the compact flow and massage system FunPak 4.2 – the ideal combination for all your swim training and aqua fitness needs. Featuring decorative tile made of Ezarri Glass mosaic, this visually stunning pool has an elegant, fresh appearance that is sure to inspire greatness. Sample tiling along the side of the pool can be viewed live in “pools.info” in Geeste.

MODENA D-Line

What makes a modern swimming pool great?

A great modern swimming pool should be safe, comfortable, and welcoming. Featuring wide steps, wide seating, and targeted massage jets designed to deliver relaxation and rejuvenation, a great modern swimming pool should also focus on fitness as well as comfort. Counter-current swimming systems encourage a safe, efficient, and luxurious daily fitness routine, while also providing a place to relax and destress after a long day. Modena is the ideal swimming pool for every occasion, and that is what makes a great pool. From its beautifully designed staircase to the stylish, simplistic design that would have the most discerning pool aficionado begging for more, Modena offers simplicity where it should be and function where you want it. Truly, the best of both worlds.

1 Simple and functional

Featuring a simple, yet functional staircase designed to offer easy access to everyone, the 6-step entry extends to the pool floor and provides a safe, secure method of entry and exit for all guests. The large sitting and reclining steps offer plenty of space for the whole family – offering a variety of heights and angles across the corners of the pool.

Two additional LED spotlights illuminate the entire pool area at night to create a cosy, safe atmosphere.

2 FunPak

The FunPak is the ultimate counter-swimming and massage system designed exclusively by RivieraPool for the Modena. Two powerful counter-swim nozzles provide the perfect amount of resistance for swimmers, offering the ultimate fitness and training experience for every level. Six microjets provide deep, thumb-pressure massage on the back muscles, while two powerful super-jets work on the lower back, and a geyser-jet is available for the feet and calves. Also available is the optional two-row air bubble duct, transforming Modena into a luxurious oxygen bed.

3 The WetLounge®

The enjoyment we get from a pool goes so far beyond just seeing, feeling, and moving in the water – and that is where the WetLounge comes in. The WetLounge is a water terrace within the pool. An eye-catching visual display of beautiful coloured lighting and a fire bowl at night, this relaxation zone is complete with lounge furniture and throw pillows – providing the ideal area to socialise, connect, or play with the little ones. The WetLounge gives your personal backyard oasis a unique, special flair that you will cherish for years to come.

OUR LITTLE ONES 270 CM X 550 CM

How much swimming pool does a person need?

Believe it or not, size isn't everything. At RivieraPool, our expert pool design team has created a robust line of smaller pools designed to offer maximum functionality in a minimal area. Our Ancona 550 and Modena 550 pools can include a wide assortment of high-end features upon request.

The Modena 550 Swim & Fun model features all of the compact technology within the shaft of the pool, delivering all of the flow and massage technology that the Modena is known for – all in a smaller size. These systems are installed and tested within the factory and are ready to use immediately.

The Ancona 550 and Modena 550 are pools that have been carefully designed for smaller backyards and gardens. Despite the small size, these pools feature

all of the functionality and fitness benefits of the larger pools and can be equipped with additional features as requested. From the wide, voluminous water pressure to the selective, intense massage, the counter-swimming features to the soothing relaxation current, these pools are available and ideal for every family backyard.

Offering additional protection from leaves and dirt, the Thermosafe solar roller shutter keeps your pool clean while also protecting your children and pets. The roller shutter of the Integra 2-13 is virtually invisible under a flatwater bench.

Our small sized pools are ideal for the whole family!

Compact. Clean. Perfect. All day, every day.

LINEAR D-Line

Four steps:
Design across the board.

The Linear is a stunningly straight, simple, and clean pool that embraces the brilliant elegance of nature while offering modern advances in swimming technology. Delivering clear lines that drive towards the water and across the stairs, the granicite-coloured pool surface and the dark natural stone form a perfect visual display and a harmonious transition into the water. The Linear offers a beautiful visual experience all-year long – even in the winter. With the counter-current and massage system installed

as discretely as possible, the Linear features soothing moving water that you can feel but hardly see. The counter-swimming system is installed in the step end of the pool, with the suction coming from the roller shutter box, providing instant access to a robust workout without leaving the comfort of your pool.

Linear in our elegant and fresh papyrus colour.

Same pool...but featuring our infinity channel, offering a unique feature and highlight alongside a nearby lake.

Time to relax.

LINEAR D-Line

Is there anything better than a quiet, mild summer night spent at home by your own pool? Imagine the delicately shining water, the sweet sounds of quietly moving water, and the beautiful surroundings of your own home. Imagine the soft light of a warm fire, a glass of good wine, perhaps some engaging conversation, some quiet romantic moments, or

maybe some much-needed peace and quiet. No matter the occasion, a pool is so much more than a feature of your house – it is a precious opportunity to reconnect with yourself, your family, and rejuvenate from the daily stresses of life. Our Linear is the perfect addition to your backyard and home garden.

Design all along the line.

LINEAR RS D-Line

Linear RS - simply clever...

At RivieraPool, we believe that simple, efficient design simply cannot be beaten. That is why we take extra time and care to engineer each pool in the most thoughtful, logical, and functional way possible. For example, our roller shutter is discretely and expertly installed to fit directly under the stairs. This space-saving, invisibly accessible feature offers two distinct advantages: It allows the first step to be safer and wider, creating a shallow water area that everyone can enjoy. It creates the

space on the opposite side to install additional features such as our infinity channel, WetLounge, or counter-current technology.

No matter how you look at it, the Linear RS offers the absolute best in visually pleasing and technologically savvy pool design and solutions.

Linear RS with infinity channel. The elegant combination of the staircase with integrated roller shutter shaft and the infinity edge that opens a glance into the surroundings.

...cleverly constructed.

The evening mood around the backyard pool garden is filled with peace, bliss, and relaxation. Our pools offer extremely high-water levels, elegant lighting, and supreme comfort.

WET LOUNGE® – The shallow water zone

RivieraPool is proud to have launched the first-of-its-kind shallow water zone for prefabricated pools. Catching the eye of the judges at the Golden Wave Awards in 2015, the WetLounge was one of the innovative and key factors in RivieraPool receiving the main prize in the swimming pool category.

The WetLounge is an extension of the pool, adding an additional 2 metres to the overall size. At 15 centimetres deep, the WetLounge creates a completely new living and leisure space that is both functional, attractive, and stylish. By incorporating seating areas and lounge furniture into the design of the pool, the WetLounge delivers a lagoon-like environment. With the addition of a brilliant fire bowl centrepiece and

LED lighting, the WetLounge transforms any backyard space into a world-class lounging area that is sure to impress. When creating the WetLounge, RivieraPool designers set out to reimagine the design and functionality of the backyard swimming pool and water garden – and the results are nothing short of spectacular. The WetLounge transforms any space into a serene water sanctuary. Staging a space that replicated life by the water, RivieraPool created the WetLounge to help homeowners create a little piece of paradise in the comfort of their backyard. Designed to become the epicentre of the homeowner's social life, the WetLounge was always envisioned to be a place where friends and family came together to connect, relax, and celebrate.

"RivieraPool knows how to use the WetLounge in order to redefine and reimagine the pool experience in a larger context," said Golden Wave Award jurors in 2015. "Aspects of gardening and landscaping are seamlessly incorporated, as well as specific attention to creating a home-like atmosphere that makes any home the centre of the pool owner's social life." At RivieraPool, we are honoured to have received the Golden Wave Award – not only because it honours our tireless work and drive for innovation, but because it has helped us connect with pool owners throughout the world and provide them with a swimming pool that is sure to elevate their relaxation and fitness experience to a whole new dimension.

ROM

Classic. Stylish. Timeless.

Classic. Stylish. Timeless. These are the quintessential features of our iconic Roman design. From the clear lines to the round, generous entry featuring gracefully curved steps, the noble and elegant design of our Rom pool remains magnificent and enduring in both style and function.

Featuring a powerful counter-current swimming system that can optionally be integrated and spotlights that illuminate every beautiful curve and simple line of this spectacular pool, the Rom offers luxury, functionality,

and beauty that will leave you breathless. Ideal for entertaining, relaxing, exercising, or spending time with friends and family, the Rom offers timeless elegance, chic simplicity, and aesthetic elevation to any backyard or water garden.

... elegant, timeless, and classic. The Rom.

Swimming pool with overflow channel ...

If you have ever spent time in a luxury hotel swimming pool, you know how smooth, relaxing, and lavish they can be. Overflow pools frequently found in premium hotels and spas deliver the ultimate swimming experience. The water flows smoothly into an overflow channel and through a filtration device, creating a superior swimming experience. Beyond the functionality and practicality the overflow channel provides, it also delivers a unique blend of sophistication and style. RivieraPool helps you bring the majesty, opulence, and comfort of an overflow channel directly to your own home pool experience. When paired with beautiful natural stone, the overflow channel creates a smooth transition between the building and your swimming pool.

Hotel pool with overflow channel and gutter grating.

Outdoor pool with stone-covered overflow channel.

... the ultimate in comfort.

The tremendously high water-level featured in the overflow basins provide a soothing, calming effect. The generously sized pool offers stunning visuals and gentle sounds that are relaxing and invigorating. Cultivating a soothing, peaceful ambiance, your backyard oasis and water garden will transform your home into a beautiful refuge of serenity and comfort.

RivieraPool.com

Extensions

Elevate the look and feel of your D-Line pool with an assortment of high-quality add-ons designed to complement your RivieraPool. Choose from a wide variety of extensions, including the infinity channel, decorative tiles crafted from glass mosaic, natural coping stones or the WetLounge. Choose to add the shallow water zone that extends your pool and create an entirely new outdoor living area ideal for relaxing in shallow water. Ideal for gatherings, resting, or creating the ideal play area for your children, we offer a full suite of extensions designed to deliver an incredible swimming pool experience.

WetLounge®

Upgrade your backyard oasis and bathing garden with our most cutting-edge feature – our iconic two-metre-long WetLounge. Complete your pool with this brilliant flatwater zone. Whether you sit, lie, or lounge in this pristine shallow water, the ambiance is sure to transport you to another world.

As chic lighting dances softly across the water and the brilliant fire bowl delivers warm light throughout your backyard garden, the WetLounge creates a unique atmosphere that is both aesthetically pleasing as well as tremendously comfortable.

New!

Decorative tile crafted from glass mosaic.

Enhance the visual brilliance of your Riviera Pool with elegant, decorative glass mosaic tile from Ezarri. Choose from a variety of colours, textures, and materials.

View additional colours at:

Infinity edge

A deeper overflow channel designed to allow water to smoothly and elegantly fall from the size of the pool while creating a stunning panoramic view, the infinity edge is the ultimate way to stage your pool for maximum aesthetic appeal. For those who have a beautiful view of a luscious landscape that overlooks a lake, river, or sea, this functional and efficient panorama channel is an absolute must. The prefabricated materials are designed and engineered specifically to provide maximum functionality with minimal visual disruption – creating an elegant and seamless experience that will leave you breathless. Contact your RivieraPool specialist to create your own unique infinity experience and receive a personalised quote.

High water level

High water levels that foster an environment of serenity and relaxation provide a soothing, calming effect – bringing tranquillity and comfort to your backyard. The generously sized and meticulously designed pool offers stunning visuals and gentle sounds that are calming and refreshing. Cultivating a soothing, peaceful ambiance, your backyard oasis and water garden will transform your home into a beautiful refuge of peacefulness and relaxation.

Handrails and grab rails

At RivieraPool, safety and security is our number one priority. Every D-Line pool features high-quality, premium stainless-steel handrails and grab rails that have been customised and designed exclusively for RivieraPool. Chic, smart, and safe, RivieraPool handrails and grab rails are the perfect match to our iconic D-Line and provide security as well as style.

Natural stone design and style

RivieraPool creates a discrete and elegant hidden edge that sits right below the surface of the water. Using beautiful, overhanging natural stones, a hidden edge creates a visual illusion of a high water level.

Our granicite pool colour is crafted to give the appearance and illusion of a naturally occurring, single cast piece of stone – delivering a streamlined and remarkable visual experience that will elevate the atmosphere of your backyard water garden and provide unsurpassed harmony to your home.

Our extensions are constantly updated. For further information please visit:

www.dlinepools.de

The colours

The relationship between colour and water is a magical one. The optical properties of water can transform the tone, look, and vibrancy of any colour – creating a unique opportunity to customise the mood and atmosphere of your swimming pool.

By blending specific colours and materials with the water, RivieraPool is able to create a fully customisable visual experience that serves as a seamless and natural transition from the materials of the pool to the landscaping of your backyard oasis. The colours of the stone and pool materials create the ideal backdrop to feature the calm, transparent water – creating the perfect and most beautiful impression of your personal piece of paradise.

Granite maximises the reflection of the water, the pool colours blend seamlessly within the landscaping, and even in dark or rainy weather, the natural appearance of the pool will leave you breathless..

All photos shown here are only examples, and due to printing, offer only an approximation of the actual tone, colour, and appearance. Have your RivieraPool dealer show you original colour samples.

Granite stone grey

The pool colour granite stone grey delivers an impressive look and feel of real, natural stone. When paired with natural stone paving around the pool, the results are stunning. Creating the illusion that the entire pool is built from one single piece of natural stone, the granite stone grey pool looks bright and fresh in the sun and creates bold, blue water. Even if dark colours that lose their intensity and tone over time, the natural granite stone grey colour will retain its vibrancy throughout the years.

Silver grey

The pool colour silver grey offers convenience, elegance, and beauty all in one. With water shining brightly at all depths against this subtle colour, it provides a classic, clean appearance. The silver grey pool offers a modern yet timeless look that is sure to please. Creating a bright, brilliant blue hue to the water, this confident yet reserved colour is suitable for any environment, occasion, or size.

White

On a white surface, water becomes a beautiful pale blue that glistens in the sun. Polished stainless steel accessories deliver style, contrast, and elegance to the pool. White gives a bright, fresh look that is both classic and modern. The white colour gives the pool a distinct maritime style and is ideal as well for indoor pools. In the evening, the white basin provides the ultimate backdrop for an exceptional ambiance.

Papyrus

A chic, classic, and easy to maintain pool colour. Papyrus allows the crisp, clean lines and elegant design of your pool to shine while the colour effortlessly blends in with the scenery. Transforming the colour of the water into a radiant blue, but not as bold as the white basin, papyrus compliments almost any natural background or landscaping, and is the ideal companion for your backyard water garden. Due to its versatility and natural appearance, papyrus is highly recommended for outdoor use.

Sand

There is nothing more relaxing than spending some quiet moments along the soft beaches and warm sand, and with our sand-coloured pool, we help transform your backyard swimming and water lounge area into your own little piece of paradise. Creating a vibrant and rich turquoise colour in the water, our sand colour will drive up the tropical vibes while still providing a magnificent backdrop for your swimming pool. Featuring single-coloured steps available in sand or beige, the basin provides a distinct visual transition from the sandstone coping stones to the pool. Built-in accessories and handrails give a light, bright accent to the pool.

Sea blue

A delicately subtle, monochromatic moment – our sea blue colour gives your pool a deep, lush, rich appearance that is both classic and easy to maintain. With stainless-steel built-in accessories and handrails, this timeless and classy colour combination is absolute perfection for anyone who adores the look of a strong, light blue hue. The luxurious look of our sea blue basin is simply divine.

Thermosafe roller shutter cover

Tailor-made and custom designed for your RivieraPool.

Our exclusive Thermosafe roller shutter covers are engineered for use in RivieraPool prefabricated swimming pools. Adapted and adjusted to the specific pool dimensions, shape, stairs, and layout of your pool, the Thermosafe roller shutter cover delivers safety, security, and convenience all in one brilliantly designed accessory. With a precise water level regulator and overflow fitting designed for optimal operation of the roller shutter, you can rest assured knowing your pool will be protected from the elements and your friends, family, children, and pets are kept safe. Featuring drive technology with the motor mount and pool wall ducts that are specially designed for our pools, the Thermosafe roller shutter is factory-built and installed.

Expertly tested for quality and resistance.

Our Thermosafe roller shutter covers are LNE tested and certified. When combined with the optional safety lock,

the Thermosafe roller shutter covers comply with NF P90-308, the only European safety law for swimming pool covers. RivieraPool is passionate about meeting and exceeding these stringent standards. RivieraPool's polycarbonate profiles are largely hail-resistant and recognised in the Swiss hail register for quality and excellence.

Energy-saving. Eco-friendly. Highly efficient.

Over 80% of the thermal energy of your pool is lost through the water surface – whether through evaporation or

convection. However, containing this heat and preventing thermal energy loss is as simple as installing one of the Thermosafe roller shutter covers. In addition to saving energy, reducing heating bills, and promoting sustainable practices, using one of our solar roller shutters to transmit solar energy into the pool delivers the ultimate in efficiency and environmentally friendly practices. Global data surrounding solar power and radiation show that between the months of May and August, the average solar power cover can expect nearly 160 kW per square metre per month in energy reserves. A 4 x 8 m outdoor swimming pool can be supplied with an average of around 100 kWh per day during this period – creating the ideal opportunity to maximise efficiency and minimise energy loss.

Fig. Left: Every Thermosafe roller shutter cover of polycarbonate includes a certification of guarantee

Heating your pool with the power of the sun.

- Energy efficient
- Optimal security and safety
- Sleek, elegant design and look

Style and safety that goes above and beyond

- Offers optimal safety and security for your friends, family, children, and pets
- Protects against unwanted dirt, leaves, and pollen
- Maximises energy efficiency
- Sleek, elegant design and look

Our Thermosafe slats are available in two styles:

With two styles to choose from, you can create a customised pool security experience that meets your unique needs, goals, and priorities. Choose between PVC, available in white, grey or solar, and the extremely durable, largely hail-proof, and easy to maintain polycarbonate solar or solar silver vaporised version.

PVC white or grey

This roller shutter cover keeps the pool warm and ensures a good balance of energy and heat. It protects against dirt, leaves, and debris while providing safety and protection features designed to maintain the safety of people and animals. This solid pool cover can be closed and opened using a key switch.

White

Grey

White

PVC solar

The solar PVC cover is an effective, energy-saving pool cover designed to minimise energy consumption and maximise the safety and security of those around it. Not only does the solar PVC cover keep heat within the pool, but it also utilises solar power to maintain the temperature of the pool and heat the water. The black underside keeps the water dark and prevents the growth of algae.

Polycarbonate solar

The ideal material for roller shutters, polycarbonate is both impact-resistant and is certified as being hail resistant in the hail register. Featuring a highly transparent surface and a black underside this, carefully engineered roller shutter with its new "anti-algae profile" is designed to leave dirt and contaminants outside of the pool leaving your water clean, clear, and protected.

Polycarbonate solar, silver vaporised

Bring the protection, safety, and cleanliness to a higher, more stylish level with the silver vaporised polycarbonate solar slats. Bringing a stainless-steel look to your cover, this version provides a solar heating effect to your pool. However, the heat effect is not as big as for the standard polycarbonate solar slats as more sunlight is reflected.

RivieraPool roller shutter systems

Thermosafe roller shutter covers are generally installed in underfloor systems. The roller shutter is discretely rolled up below the water level.

Thermosafe advantages:

- The cover is expertly engineered and installed below the water surface, delivering a discrete and seamless appearance that requires no additional covering.
- The cover remains clean and disinfected with the carefully filtered pool water, preventing dirt from sticking.
- Any dirt deposits can be quickly, easily, and effortlessly vacuumed using a vacuum cleaner connected to the skimmer.

There are **five variants** available of the underfloor roller shutters designed exclusively for our prefabricated pools.

1 Roller shutter shaft Integra 2-13:

- No loss of swimming length or space.
- The cover is installed below the watersurface, creating a flatwater bench for lounging.
- No annoying or intrusive cover elements in or around the pool surface.
- Extended high-water level up to 5 cm below the coping stones is available.
- Easy, secure access through the hinged cover. The cover can be easily opened and folded forward.

2 Linear RS roller shutter shaft

- Seamlessly integrated and expertly installed roller shutter shaft in the staircase.
- The upper step is twice as wide, creating a flatwater sitting, lying, and lounging area.
- The first two steps are designed to double as a lid with hinges, allowing for easy opening and access.

The roller shutter shaft extends the pool by 50 cm.

The roller shutter shaft extends the pool by 25 cm.

The roller shutter shaft extends the pool by 80 cm.

The niche extends the pool by approx. 35 cm and shortens the swimming length by approx. 50 cm.

Extends the pool by approx. 30 cm and shortens the swimming length by approx. 62 cm.

3

Underfloor roller shutter shaft

- No loss of swimming length, straight pool wall.
- Cover made of durable wood or stone at the same level as the coping stones, delivering easy and direct access to the roller shutters and roll-up fixture.

4

Roller shutter niche for skimmer pools

- The ultimate in visual discretion and streamlined design, straight pool wall makes this ideal to turn around.
- Offering total convenience and discretion, the roller shutter is located below the coping stones and behind a removable pool wall, while slats come out of a gap below the water level.
- The gap at the bottom of the removable pool wall makes cleaning and maintenance easy and accessible.
- An integrated skimmer is located in the incline of the niche, while the lid is accessible from above.
- The suction fittings of the counter-current system can be completely concealed with this model.

5

Inline roller shutter bench

- The foldable, inline bench delivering a sleek and elegant look. Factory installed, the 370 inline bench is available with an optional air bubble system. Ideal for overflow pools.
- Roller shutter bench is factory installed for convenience and efficiency.
- The cover is hinged and can be easily opened up and adjusted.

Quality made in Germany.

Each RivieraPool is made of **seven layers**, with each taking on a specific function and purpose-designed to meet our stringent and sophisticated special requirements, as well as industry standards in swimming pool construction. Combined, these critical seven layers are the key ingredients responsible for making your RivieraPool exceptionally well crafted and beautifully constructed.

Colourfast, easy to care for, kind to your skin.

- 1 Duracolor 90 HD – the synthetic, high-density paint carrier layer specifically developed for heavily used swimming pool surfaces.
- 2 Fine cell layer to minimise fibre prints along the high-gloss surface, creating a smoother, easier-to-care-for pool surface.

Resistant to osmosis due to epoxy acrylate.

- 3 Robust carrier layer formulated with high-strength random fibre mats and chemically durable fibreglass.
- 4 Fortified fine fibreglass layer as its structural base.
- 5 Ceramic coupling layer designed to create a homogenous and durable structure that is ready to stand the test of time. All layers are embedded in our resilient epoxy acrylate, providing resistance to wear and tear and improving overall efficiency.

Insulation that saves energy.

- 6 30 mm of rigid polyurethane foam along the bottom of the pool and 20 mm within the walls.

Stabilisation.

- 7 Powerful outer layer designed to contain, compress, and encapsulate the many layers of expertly engineered craftsmanship of your pool. Delivering superior structure stability, each pool is reinforced with steel inserts within the longitudinal walls to ensure dimensional accuracy and ultimate durability.

At RivieraPool, we take our commitment to our customers and the swimming pool industry seriously. From the long nights engineering the next big swimming pool technological advancement to painstakingly crafting a prefabricated pool for our valued clients, everything we do is focused on the quality, comfort, durability, longevity, and strength of our products. We focus on quality management throughout our entire process – from materials to design, engineering meetings to construction, delivery to customer service, and beyond. As committed members of the AVK (Working Group for Reinforced Plastics), our pro-

duction technicians work alongside our raw material suppliers to examine every facet of each pool we design, sell, and install. We explore how treatment agents will impact the durability, consider how different disinfectants effect the overall experience, and consider all environmental factors and how it might relate to the longevity and quality of our product. We rigorously test mechanical processes and select raw materials that adhere to our strict standards. We examine each component for colour fastness, temperature resilience, and durability. Each product, design, and material are subjected to extensive testing for assess

its ability to withstand multiple practical loads. We focus on highly specific parameters and requirements in order to deliver a superior product that will elevate your home swimming pool and backyard water garden experience. We take the time to maintain strict records and extensive material usage logs that span throughout the years – from our very first products to the most up-and-coming designs. In other words, we will stop at absolutely

nothing to ensure a product and experience that you will absolutely love and adore for years and years to come. Our commitment to excellence is without a doubt our number one advantage over any other swimming pool on the market today.

20 years on water tightness of the fibreglass pool shell.

RivieraPool guarantees long-lasting durability and quality:

- **20-Year guarantee** on water tightness of the fibreglass pool body
- **10-Year guarantee** on non-blistering and non-delamination pool body
- **5-Year guarantee** against defects in built-in parts and pipes
- **2-Year guarantee** against defects on electrical components (pumps, motors, heaters, etc)

Applies throughout the European Union to every first-time, private buyer of a RivieraPool prefabricated swimming pool.

Economical & safe

More than a swimming pool ...

When you purchase an automobile, you expect the manufacturer to have taken the time to explore every aspect of safety, low operating costs, longevity and driving pleasure. After all, it is a product that has been perfected and laboured over to create a universally

loved experience that everyone can agree on. This is exactly what you can expect from your RivieraPool. We have the years of experience and organisational commitment to deliver a swimming pool that features stylish design, robust construction, superior quality,

outstanding functionality, and unsurpassed beauty that will endure for decades. Manufactured in the factory, installed in your garden and ready to use in a few days.

... Design. Quality. Functionality.

Design concept:

- Design forms that are straightforward, chic, and timeless
- Surface colours that deliver a natural stone look
- Fittings crafted from durable stainless steel
- Contemporary coping stones
- Unique handrails that are safe and beautiful
- Applications made from precious wood
- Colours that express your unique style

Choose to add on one of our iconic solar roller shutter covers for additional warmth, safety, and security, 5 years warranty

Safety concept:

- Roller shutter safety edge
- Roller shutter slats that are chic and strong
- Stairs in a different colour (optional) and non-slip materials
- Handrails for safe entry and exit
- Safety suction fittings according to DIN
- Stair construction according to DIN standard

Integrated roller shutter safety edge

6° wall incline featuring soft radii and corners to deliver easy, convenient, and stress-free cleaning of walls and floors with automatic floor cleaner

Easy-care, pore-free smooth surface made of Duracolor 90 HD

"Integra 2-13" with flat water bench delivers a high-water level that maintains the entire swimming area for maximum comfort and efficiency

Stainless steel fittings and handrails

Convenient, easy access to the technical equipment. Four-part wooden deck, hinged

Large, non-slip steps that also serve as sitting and lounging areas

FunPak 4.2: Flow and massage system for daily fitness, comfort, and relaxation

Safety suction fittings

Energy concept:

- Insulated multi-layer construction
- Thermotec backfilling provides additional insulation
- "Thermosafe" solar roller shutter cover adds heat into the pool

Seven layers of high-quality epoxy-acrylate with ceramic core and steel inserts (SIS system)

Hard foam insulation built into the walls and floor of the pool, stable and frost-proof construction

All fittings within the backfill area are made of sturdy gunmetal or stainless steel

Construction:

- Single-piece construction made of epoxy acrylate
- Pore-free, super smooth surface that is easy to care for and maintain
- Time-tested sandwich construction since 1970
- Steel reinforcements for stability and security
- 6° wall incline
- Economical, efficient, and affordable to operate

Integrated technical equipment

Smart roller shutter systems

...that safely cover the water and maintain heat

Strong, powerful counter-current and massage systems for fitness and relaxation

FunPak 4.2

Underwater massage

FunPak is the compact flow and massage system designed by RivieraPool that turns your Modena step-end into an active centre of fun, fitness, and relaxation. Whether you are looking for a powerful massage or a shallow rush of soothing water - FunPak delivers.

Your RivieraPool swimming pool is ready to go right from the beginning with everything installed at the factory.

Here is where the real strengths of your RivieraPool really come into play:

Functionality:

- Counter current systems help you achieve your fitness or swimming training right in your backyard - no matter how big your pool is. powerful counter-swim nozzles for active swim training, and a floor geyser, you can achieve a total body massage or terrific workout in one place.
- The Modena step offers wonderful space to relax and unwind in the sun.
- The Fun Pak: A massage package that transforms your Modena step-end to an active centre of rest, comfort, and relaxation. With two powerful massage jets for the lower back, six microjet massage jets radiating at specific points on the left and right of the spine, two
- Aqua Fitness: Achieving your daily water aerobics goals is easy with our counter-current system. RivieraPool swimming pools also feature handrails for exercises on the feet and knees, as well as matching handles for exercises for the hips and arm rests for training the spine.

1

Counter-current system

The double jet counter-current system is at the heart of your FunPak, providing necessary resistance and comfort to your fitness regimen or relaxation sessions. Both nozzles are driven by a 2.6 kW pump unit that easily switches on with the push of a button. A motor valve switches the direction of the water output either to the massage jets or to the counter-swim, helping you achieve your health and wellness goals easily and comfortably.

The FunPak Health and wellness highlights:

2

Superjet 19 massage jets

Two powerful and fully adjustable air and water nozzles are ideal for larger body areas including the back and deliver a powerful and restorative massage.

3

Microjet massage jets

Six powerful microjet massage jets are targeted at specific points on the left and right side of the spine, providing a deep and direct massage.

4

Geyser

A tremendously powerful water jet feature that has it all. This powerful fountain delivers tremendously deep massages to the legs, feet, and body that rivals any massage you might receive in a high-priced salon or spa.

Start imagining. Start dreaming. Start planning...

... Living by the water.

Stop dreaming and start doing! Creating the pool of your dreams starts with some professional planning – and our team is here to help you envision and create a pool that includes all of the details that are important to you and your vision.

Modern computer modelling and digital rendering make envisioning and creating your dream pool easy, fast, and fun. Consider a wide assortment of variations and possibilities digitally. We will work with your local landscaping company to make your dream come true, and through targeted and mindful design, save you money over the long run by creating the perfect backyard water garden for you and your family the first time.

"poolsplace" - Rheinau-Linx
Modern pool exhibition on over 14.000 m².

RivieraPool proudly partners with a total of six manufacturers within the pool and swimming pond industry to deliver a swimming pool and spa experience that is far superior to any other product on the market today. Featuring two prefabricated swimming pools, one with classic filter technology, and a natural

pool with crystal clear water, whirlpools, showers, and other water features – RivieraPool offers a lavish and exclusive pool house for clients to dream up and explore the possibility of a backyard water garden in the comfort of their own home.

Within PoolsPlace, interested clients can explore chic ideas and find endless inspiration for their own bathing garden, or simply find superior accessories for their existing swimming pool. Our exhibition and advice centre offers insight, information, and guidance into the world of pools, including a comprehensive overview of the different pool types and shapes, as well as the best accessories to match. PoolsPlace employees will offer advice, provide samples, and review various material options. They will discuss a variety of options to cultivate your ideal water garden – from identifying the best swimming pool retailers to

landscaping companies, architects to planners, and special designers – everything will be laid out and presented to you in a way that is stress-free, fun, and convenient. For more information, visit us at:

Rengers Group of Companies

Proud to be a family-owned and operated company, RivieraPool has established itself as being one of the leading manufacturers of prefabricated swimming pools and whirlpools throughout Europe. Today, RivieraPool products can be found in private bathing gardens and indoor swimming pools throughout the world, including in hotels and on cruise ships, as well as in municipal leisure pools in hundreds of communities.

The Rengers Group of companies includes three companies founded in Germany and Slovakia. With a total of 200 employees, the Rengers Group

of Companies include Rengers Kunststoffverarbeitung GmbH, which is responsible for all production, and RivieraPool Fertigschwimmbad GmbH which is responsible for the sale and support of all products. The manufacturing plant in Trnava in Slovakia produces high-quality products for the markets in Western and Eastern Europe. In our innovative 1.900 square metre exhibition and showroom located in Geeste-Dalum, RivieraPool displays our cutting-edge swimming pools, sauna plunge pools, and whirlpools featuring a variety of different options, and our Europe-wide sales network of specialist dealers guarantees superior custo-

mer service, expert advice, and on-site assembly.

Showrooms and exhibition rooms throughout Germany

Schedule your appointment with one of our highly trained RivieraPartner or ProPartner experts today, and receive the advice, information, and support you need to create the backyard swimming pool of your dreams. Choose between an on-site visit at your home or consider going to one of our luxury showrooms located throughout

Germany. Each of our specialists have been trained and are available to offer you product details, installation suggestions, and individual solutions designed to help you bring the magic of a RivieraPool swimming pool or spa to life.

The delivery of your RivieraPool...

takes place either directly from the factory or from the dealer's warehouse. Upon delivery, your pool specialist or dealer will be available on-site to help take care of the details and educate you on the use and maintenance for your new RivieraPool – from cleaning to water care, and beyond.

The service

Your RivieraPool specialist and approved dealer will also be available for all of your service needs and will take care of all of your needs, concerns, wishes, or questions. Fast spare part supply, quick service, and a technical hotline to our factory is available with each RivieraPool purchase. Each pool has its own serial identifier, helping you obtain parts and information on your product quickly, easily, and efficiently – even decades down the road.
